| The strength of mapping is to be written as 1: Low, 2: Medium, 3: High<br>Each CO of the course must map to at least one PO. |                         |   |   |   |   |   |   |   |   |    |    |    |     |   |

| Assessment  |
|---|
| <p>The assessment is based on MSE, ISE and ESE.</p> <p>MSE shall be typically on modules 1 to 3.</p> <p>ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.</p> <p>ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.</p> <p>For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p> |

#### CO-PO Mapping

|            | Programme Outcomes (PO) |   |   |   |   |   |   |   |   |    |    |    | PSO |   |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
|            | 1                       | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1   | 2 |
| <b>CO1</b> | 1                       |   |   |   |   |   |   |   |   |    |    |    | 1   |   |
| <b>CO2</b> | 2                       |   |   |   | 2 |   |   |   |   |    |    |    |     |   |
| <b>CO3</b> |                         |   |   |   | 3 |   |   |   |   |    |    |    |     |   |

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO.

#### Assessment

The assessment is based on MSE, ISE and ESE.  
MSE shall be typically on modules 1 to 3.  
ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.  
ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.  
For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

| <p>The strength of mapping is to be written as 1: Low, 2: Medium, 3: High<br/> Each CO of the course must map to at least one PO.</p> |                                |   |   |   |   |   |   |   |   |    |    |    |            |   |

| <b>Assessment</b>   |
|---|
| <p>The assessment is based on MSE, ISE and ESE.<br/> MSE shall be typically on modules 1 to 3.<br/> ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.<br/> ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.<br/> For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p> |

| <b>CO3</b>   |                                |   |   |   |   |   | 3 |   | 2 |    | 2  |    |            |   |
| The strength of mapping is to be written as 1: Low, 2: Medium, 3: High<br>Each CO of the course must map to at least one PO. |                                |   |   |   |   |   |   |   |   |    |    |    |            |   |

| <b>Assessment</b>   |
|---|
| <p>The assessment is based on MSE, ISE and ESE.</p> <p>MSE shall be typically on modules 1 to 3.</p> <p>ISE shall be taken throughout the semester in the form of teacher’s assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.</p> <p>ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.</p> <p>For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)</p> |

#### List of Experiments / Lab Activities/Topics

##### List of Lab Activities:

1. Program on input/output stream
2. Program on class and objects.
3. Program on Inline/Friend functions.
4. Program on Constructor/Destructors.
5. Program static variables/class/functions.
6. Program on polymorphism.
7. Program on different types of inheritance.
8. Program on operator overloading.
9. Program on File Operations.
10. Program on Templates.

#### CO-PO Mapping

|     | Programme Outcomes (PO) |   |   |   |   |   |   |   |   |    |    |    | PSO |   |
|-----|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
|     | 1                       | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1   | 2 |
| CO1 |                         |   |   | 2 |   |   |   |   |   |    |    |    |     |   |
| CO2 |                         | 2 |   |   | 3 |   |   |   |   |    |    |    | 2   |   |
| CO3 |                         |   | 3 |   | 3 |   |   |   |   |    |    |    | 2   | 1 |

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO, and preferably to only one PO.

#### Assessment

There are three components of lab assessment, LA1, LA2 and Lab ESE.  
IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%

| Assessment | Based on                             | Conducted by   | Typical Schedule  | Marks |
|------------|--------------------------------------|--|---|-------|
| LA1        | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 1 to Week 8<br>Marks Submission at the end of Week 8    | 30    |
| LA2        | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 9 to Week 16<br>Marks Submission at the end of Week 16  | 30    |
| Lab ESE    | Lab activities, journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19<br>Marks Submission at the end of Week 19 | 40    |

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

| <b>I</b>   | <b>Introduction to Python:</b><br>The basic elements of python, Branching Programs, Control Structures, Strings and Input, Iteration, Functions and scoping, Specifications, Recursion, Global variables.  |                                  |            |                               | <b>4</b>                            |
| <b>II</b>  | <b>Advanced features of Python:</b><br>Modules, Files, System Functions and Parameters, Strings, Tuples, Lists and Dictionaries, Lists and Mutability, Functions as Objects.   |                                  |            |                               | <b>4</b>                            |
| <b>III</b>   | <b>Classes and Object-Oriented Programming:</b><br>Abstract Data Types and Classes, Inheritance, Encapsulation and Information Hiding.   |                                  |            |                               | <b>4</b>                            |
| <b>IV</b>  | <b>Python-Numpy and Pandas:</b><br>NumPy: Introduction, Numpy array, Numpy array indexing, Numpy operations. Pandas: Series, Data frames, managing missing data, groupby, merging & concatenation, operations, data input and data output.   |                                  |            |                               | <b>6</b>                            |
| <b>V</b>   | <b>Python for Data Visualization:</b><br>Data Visualization through libraries like: Matplotlib, Seaborn, Plotly and Cufflinks, Geographical Plotting.  |                                  |            |                               | <b>4</b>                            |
| <b>VI</b>  | <b>Text mining modelling using NLTK:</b><br>Text Corpus, Sentence Tokenization, Word Tokenization, Removing special Characters, Expanding contractions, Removing Stopwords, Correcting words: repeated characters, Stemming & lemmatization, Part of Speech Tagging, Feature Extraction, Bag of words model, TF-IDF model, Text classification problem |                                  |            |                               | <b>6</b>                            |
| List of Experiments / Lab Activities/Topics  |  |                                  |            |                               |                                     |

**List of Lab Activities:**

1. Problem solving using core Python functionality like strings, variables, functions.
2. Problem solving using core Python functionality like tuples, dictionary, list, objects
3. Problem solving using Class & object concepts.
4. Problem statement on inheritance in classes
5. Problem based on encapsulation in classes
6. Problem statement on array
7. Problem statement on NumPy libraries with different operations
8. Problem statement on Pandas libraries with different operations
9. Problem statement on data visualization using Matplot Libraries.
10. Problem statement on data visualization using Seaborn Libraries.
11. Problem statement on text mining application using NLTK

**CO-PO Mapping**

|            | Programme Outcomes (PO) |   |   |   |   |   |   |   |   |    |    |    | PSO |   |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
|            | 1                       | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1   | 2 |
| <b>CO1</b> |                         |   | 2 |   |   |   |   |   |   |    |    |    | 3   |   |
| <b>CO2</b> |                         |   |   | 2 | 3 |   |   |   |   |    |    | 2  |     | 3 |
| <b>CO3</b> |                         |   |   |   |   |   |   |   | 1 |    |    | 2  |     | 3 |

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO, and preferably to only one PO.

**Assessment**

There are three components of lab assessment, LA1, LA2 and Lab ESE.  
IMP: Lab ESE is a separate head of passing. (min 40 %), LA1+LA2 should be min 40%

| Assessment | Based on                             | Conducted by   | Typical Schedule  | Marks |
|------------|--------------------------------------|--|---|-------|
| LA1        | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 1 to Week 8<br>Marks Submission at the end of Week 8    | 30    |
| LA2        | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 9 to Week 16<br>Marks Submission at the end of Week 16  | 30    |
| Lab ESE    | Lab activities, journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19<br>Marks Submission at the end of Week 19 | 40    |

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO, and preferably to only one PO.

| Assessment   |                                      |  |   |       |
|--|--------------------------------------|--|---|-------|
| There are three components of lab assessment, LA1, LA2 and Lab ESE.<br>IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40%  |                                      |  |   |       |
| Assessment   | Based on                             | Conducted by   | Typical Schedule  | Marks |
| LA1  | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 1 to Week 8<br>Marks Submission at the end of Week 8    | 30    |
| LA2  | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 9 to Week 16<br>Marks Submission at the end of Week 16  | 30    |
| Lab ESE  | Lab activities, journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19<br>Marks Submission at the end of Week 19 | 40    |
| Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any. |                                      |  |   |       |

#### CO-PO Mapping

|            | Programme Outcomes (PO) |   |   |   |   |   |   |   |   |    |    |    | PSO |   |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
|            | 1                       | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1   | 2 |
| <b>CO1</b> | 3                       |   | 1 |   |   |   |   |   |   |    |    |    |     |   |
| <b>CO2</b> |                         |   | 2 |   |   |   |   |   |   |    |    |    |     |   |
| <b>CO3</b> | 2                       | 3 |   |   |   |   |   |   |   |    |    |    | 1   |   |

The strength of mapping is to be written as 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO.

#### Assessment

The assessment is based on MSE, ISE and ESE.  
MSE shall be typically on modules 1 to 3.  
ISE shall be taken throughout the semester in the form of teacher's assessment. Mode of assessment can be field visit, assignments etc. and is expected to map at least one higher order PO.  
ESE shall be on all modules with around 40% weightage on modules 1 to 3 and 60% weightage on modules 4 to 6.  
For passing a theory course, Min. 40% marks in (MSE+ISE+ESE) are needed and Min. 40% marks in ESE are needed. (ESE shall be a separate head of passing)

| <b>CO-PO Mapping</b> |                                |   |   |   |   |   |   |   |   |    |    |    |            |   |
|----------------------|--------------------------------|---|---|---|---|---|---|---|---|----|----|----|------------|---|
|                      | <b>Programme Outcomes (PO)</b> |   |   |   |   |   |   |   |   |    |    |    | <b>PSO</b> |   |
|                      | 1                              | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1          | 2 |
| <b>CO1</b>           | 2                              |   |   |   |   |   |   |   |   |    |    |    |            |   |
| <b>CO2</b>           |                                | 3 |   |   |   |   |   |   |   |    |    |    | 1          |   |
| <b>CO3</b>           |                                |   |   |   |   |   |   |   | 2 |    |    |    | 2          |   |

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO, and preferably to only one PO.

| <b>Assessment</b>   |                                      |  |   |       |
|---|--------------------------------------|--|---|-------|
| There are three components of lab assessment, LA1, LA2 and Lab ESE.<br>IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40% |                                      |  |   |       |
| Assessment  | Based on                             | Conducted by   | Typical Schedule  | Marks |
| LA1   | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 1 to Week 8<br>Marks Submission at the end of Week 8    | 30    |
| LA2   | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 9 to Week 16<br>Marks Submission at the end of Week 16  | 30    |
| Lab ESE   | Lab activities, journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19<br>Marks Submission at the end of Week 19 | 40    |

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

| <b>CO-PO Mapping</b> |                                |   |   |   |   |   |   |   |   |    |    |    |            |   |
|----------------------|--------------------------------|---|---|---|---|---|---|---|---|----|----|----|------------|---|
|                      | <b>Programme Outcomes (PO)</b> |   |   |   |   |   |   |   |   |    |    |    | <b>PSO</b> |   |
|                      | 1                              | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1          | 2 |
| <b>CO1</b>           | 2                              | 1 |   |   | 3 |   |   |   |   |    |    |    |            |   |
| <b>CO2</b>           |                                | 2 |   |   |   |   |   |   |   |    | 1  |    |            |   |
| <b>CO3</b>           |                                |   | 3 |   |   |   |   |   |   |    |    |    | 2          |   |

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO, and preferably to only one PO.

| <b>Assessment</b>   |                                      |  |   |              |
|---|--------------------------------------|--|---|--------------|
| There are three components of lab assessment, LA1, LA2 and Lab ESE.<br>IMP: Lab ESE is a separate head of passing.(min 40 %), LA1+LA2 should be min 40% |                                      |  |   |              |
| <b>Assessment</b>   | <b>Based on</b>                      | <b>Conducted by</b>                                    | <b>Typical Schedule</b>   | <b>Marks</b> |
| LA1   | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 1 to Week 8<br>Marks Submission at the end of Week 8    | 30           |
| LA2   | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 9 to Week 16<br>Marks Submission at the end of Week 16  | 30           |
| Lab ESE   | Lab activities, journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19<br>Marks Submission at the end of Week 19 | 40           |

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

|  |   | <b>Credits: 2</b>                |                                     |                |              |
| Course Objectives  |   |                                  |                                     |                |              |
| <b>1</b>   | To introduce the object-oriented concepts of Java   |                                  |                                     |                |              |
| <b>2</b>   | To demonstrate the Java API's like multithreading and socket programming  |                                  |                                     |                |              |
| <b>3</b>   | To present various applications of the GUI packages of Java   |                                  |                                     |                |              |
| Course Outcomes (CO) with Bloom's Taxonomy Level                                   |   |                                  |                                     |                |              |
| At the end of the course, the students will be able to,                            |   |                                  |                                     |                |              |
| <b>CO</b>  | Define the basic knowledge of object orientation with different properties as well as different features of Java  | <b>Bloom's Taxonomy Level</b>    | <b>Bloom's Taxonomy Description</b> |                |              |
| <b>CO1</b>   | Define the basic knowledge of object orientation with different properties as well as different features of Java  | III                              | Applying                            |                |              |
| <b>CO2</b>   | Demonstrate the concepts of socket programming and multithreading   | IV                               | Analysing                           |                |              |
| <b>CO3</b>   | Implement the application using GUI with database connectivity  | VI                               | Creating                            |                |              |
| Module   | Module Contents   |                                  |                                     |                | Hours        |
| I  | <b>Fundamental Programming in Java</b><br>Structure of Java Program, Java programming environment-JVM, JIT Compiler, Bytecode, A simple Java program, source file declaration rules, naming conventions, objects and classes – declaring classes and objects, declaring member variables, defining methods, constructors, using objects, this keyword, final and static keyword, garbage collection |                                  |                                     |                | 3            |
| II   | <b>Inheritance and package</b><br>What is inheritance, types of inheritance, interfaces, super keyword, final classes and methods, packages – importing packages, naming a package, creating a package  |                                  |                                     |                | 2            |
| III  | <b>Exception Handling and I/O</b><br>Exception handling – what is exception? dealing with errors, hierarchy of exception, types of exceptions, IO stream classes  |                                  |                                     |                | 2            |
| IV   | <b>Event Handling, AWT and Swing</b><br>Event handling – basics of event handling, AWT hierarchy, types of events, AWT components, swing advanced components.   |                                  |                                     |                | 2            |
| V  | <b>Multithreading and Networking</b><br>Processes and threads, runnable interface, thread class, thread objects, thread states, thread priorities, socket programming   |                                  |                                     |                | 2            |
| VI   | <b>Database Handling and Collections Framework</b><br>Database – design of JDBC, the structured query language, JDBC types, Driver Manager - statement, connection, result-set, Collections - Collection framework  |                                  |                                     |                | 2            |

| <b>List of Experiments / Lab Activities/Topics</b>                                     |   |
|--|---|
| <b>List of Lab Activities:</b>   |   |
| 1. Program on input/output stream.   |   |
| 2. Program on class and objects.   |   |
| 3. Program on Constructor/Destructors.   |   |
| 4. Program static variables/class/functions.   |   |
| 5. Program on polymorphism.  |   |
| 6. Program on different types of inheritance and interface.                            |   |
| 7. Program on exception handling objects.  |   |
| 8. Program on multithreading.  |   |
| 9. Program on TCP/UDP communication.   |   |
| 10. Program on Swing components.   |   |
| 11. Program on AWT components.   |   |
| 12. Program on Database Connectivity and operations for data handling.                 |   |
| 13. Program on different collections like TreeSet, Set, HashMap, ArrayList, Date, etc. |   |

| LA2   | Lab activities, attendance, journal  | Lab Course Faculty                                     | During Week 9 to Week 16<br>Marks Submission at the end of Week 16  | 30    |
| Lab ESE   | Lab activities, journal/ performance | Lab Course Faculty and External Examiner as applicable | During Week 18 to Week 19<br>Marks Submission at the end of Week 19 | 40    |

Week 1 indicates starting week of a semester. Lab activities/Lab performance shall include performing experiments, mini-project, presentations, drawings, programming, and other suitable activities, as per the nature and requirement of the lab course. The experimental lab shall have typically 8-10 experiments and related activities if any.

### List of Experiments / Lab Activities/Topics

#### List of Experiments:

1. Installation of Android SDK, emulator, creating simple project and study of android project structure.
2. Installing apk on mobile device/tablet, configuring mobile device/tablet in Android Studio with developer option and running app directly on mobile device/tablet.
3. Write a program to use of different layouts.(Create Login form using Linear Layout and Relative Layout).
4. Write a program to study Intents for switching between activities. - Create Registration Activity and Registration Layout
5. Write a program to use of Intents for SMS and Telephony
6. Write a program to study and demonstrate BroadcastReceiver
7. Write a program to demonstrate Buttons, Text Fields, Checkboxes, Radio Buttons, and Toggle Buttons with their events handler (Create an app which will cover the different components, and try adding the components and different events henceforth so as to create a fully developed Android application)
8. Write a program to demonstrate Spinners, Touch Mode, Alerts, Popups, and Toasts with their events handler
9. Write a program to demonstrate Touch Mode, Menus with their events handler
10. Write a program to demonstrate notification with their action
11. Write a program to study and use of SQLite database
12. Study of publishing app to the Android Market.

### CO-PO Mapping

|            | Programme Outcomes (PO) |   |   |   |   |   |   |   |   |    |    |    | PSO |   |
|------------|-------------------------|---|---|---|---|---|---|---|---|----|----|----|-----|---|
|            | 1                       | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1   | 2 |
| <b>CO1</b> |                         | 2 |   | 1 |   |   |   |   |   |    |    |    |     |   |
| <b>CO2</b> |                         |   |   |   |   |   |   |   | 2 |    |    |    |     |   |
| <b>CO3</b> |                         |   |   |   | 2 |   |   |   |   |    |    |    |     | 1 |

The strength of mapping is to be written as 1,2,3; where, 1: Low, 2: Medium, 3: High  
Each CO of the course must map to at least one PO, and preferably to only one PO.
